Maryhurst Family Treatment Homes has a number of foster parents with years of experience in fostering as well as adoption. All parents are provided with training from the Risking Connection Approach focused on trauma-informed care of adolescents. Many of the homes are operated out of the Mockingbird Family Model for foster care and receive supplemental support and respite services above and beyond what is offered by most foster care agencies.

Psychiatric Consultation and Internal Medical Staff

Maryhurst has a contract with Seven Counties Services for psychiatric services. The psychiatrist sees clients on our main campus twice per week and is on call for assistance throughout the week. The FTH clients all have a psychiatric evaluation after placement and see the psychiatrist on a regular basis as needed for follow-up. Internal medical staff assist the foster care staff in accepting appropriate referrals. Medical care is coordinated by the parents with doctors in their community.

SERVICES AND OUTCOMESSafety

Number of Substantiated Abuse Allegations in the Past Year: 0			
Total # of Bedrooms:	Percentage of Direct Care Staff Trained in Physical Management		N/A
Single Bedrooms:	Percentage of Foster Parents Trained in Physical Management:		6.3%

Family Counseling:	11	100.0%	0.0%	School Changes in the Past Year:	6

Describe How the Program Supports Family Connections

"From the start of a child's placement, biological family members are engaged to participate in team meetings, develop treatment strategies and work to reunify if this is the child's permanency plan. If there are appropriate biological family members involved in the child's life (even if they are not to be reunified), FTH staff members will help them to understand the grief and loss that comes with separation and help them to develop new skills to be supportive to their children. Family counseling as well as support services (assistance with visitation, increased parenting skills, communication training, etc.) are available to biological families. □"

Special Interventions Available Internally

Structured and nurturing home environments are supported and cultivated in order to form the best match and most therapeutic environments for children placed in the homes. The treatment team incorporates a multidisciplinary approach in order to provide the most effective interventions for each individual child. Staff members are on call 24 hours a day and seven days a week for intervention and support needed by therapeutic foster parents. Maryhurst residential facilities are available for stabilization as well as respite.

Description of how the program exceeds licensure ratios

Yes. The Clinical specialists each have caseloads of 8 -11 clients.
